PROFFESIONAL SUMMARY

Full-stack developer with 3+ years of professional experience delivering web applications and business systems, Experienced in developing responsive interfaces, REST APIs, database-driven applications, authentication systems, and third-party integrations. Proficient in React, React Native, JavaScript, TypeScript, Java/Spring Boot, Node.js, and SQL databases. Passionate about building scalable, maintainable software solutions that solve real-world problems while continuously expanding technical expertise.

TECHNICAL SKILLS

Programming Languages: Java, JavaScript (ES6+), TypeScript, SQL,

Front-End Development: React.js, React Native, Expo, HTML5, CSS3, TailwindCSS, Bootstrap,

Back-End Development: Spring Boot ,JavaEE, Node.js, Supabase, RESTful API Development, Authentication & Authorization

Databases: MySQL, PostgreSQL,Oracle, Sqlite

Cloud & Storage: Cloudflare R2, AWS S3

Real-Time Technologies: Socket.IO, Event-Driven Applications, Real-Time Communication Systems

Development Tools: Git, GitHub, Postman, VS Code, IntelliJ IDEA,

Software Practices: OOP, Agile Methodologies, System Design, Software Testing, Debugging, Version Control, Technical Documentation

Professional Skills: Problem Solving, Analytical Thinking, Team Collaboration, Stakeholder Communication, Requirements Gathering, Technical Support, Continuous Learning

EXPERIENCE

Software Engineer | Bantu Stall (Pty) Ltd | Aug 2026 – Present

- Develop and improve web-based business systems, including supplier and gigpreneur onboarding workflows.
- Build responsive user interfaces using React and Tailwind CSS and integrate application data with Supabase.
- Support onboarding communications and workflow improvements, including email integration and account-related flows.
- Collaborate with stakeholders to translate operational requirements into usable features and iterative improvements.

Junior Software Engineer | Hiteknology Solutions | March 2026 – Aug 2026 **|** Remote

- Develop and maintain full-stack web applications for clients across multiple industries.
- Build responsive and modern user interfaces using React.js, JavaScript, Tailwind CSS, and Bootstrap.
- Develop back end services and RESTful APIs using Node.js and SQL databases.
- Integrate front-end applications with backend systems and third-party APIs.
- Design and manage relational databases, ensuring data integrity and performance optimization.
- Collaborate with project managers, designers, and stakeholders to deliver business requirements.
- Implement authentication, authorization, and security best practices within applications.
- Troubleshoot, debug, and resolve software issues while providing ongoing application support.
- Participate in code reviews, testing, deployment, and continuous improvement initiatives.

Web Developer | Limpopo Department of Economic Development, Environment and Tourism (LEDET) | February 2024 – August 2026 **|** On-site

- Developed and maintained a Helpdesk Management System used to manage and track IT support requests across the department.
- Built and enhanced web application features using Java Springboot, ReactJS, TailwindCss, and MySQL.
- Designed responsive and user-friendly interfaces to improve accessibility and user experience.

- Developed and optimized database structures, SQL queries, and stored procedures to improve system performance.
- Gathered requirements from end-users and translated business needs into technical solutions.
- Performed software testing, debugging, troubleshooting, and maintenance to ensure system reliability.
- Assisted with system deployment, user support, and technical documentation.
- Collaborated with IT teams and stakeholders to deliver system improvements and new functionality.

SELECTED PROJECTS

ResQ - Road Rescue Platform - *Supabase, React Native, PostgreSQL, Socket.IO, GoogleMaps*

- Building a road-rescue solution connecting motorists with assistance providers during breakdowns and emergencies.
- Developing API and data services, live request updates, GPS/location-based workflows, and cross-platform mobile experiences.

ShareNami - Offline File-Sharing Application - *React Native, Expo, TypeScript, SQLite*

- Developing an offline-first mobile application using QR-based sessions to initiate local device-to-device file sharing without internet access.
- Implementing local profile persistence with SQLite and building onboarding and navigation flows.

Accriva - Expense Management App - *React Native, Expo, TypeScript, Supabase*

- Building a mobile expense-management experience for recording and organizing personal spending.
- Developing a clear mobile interface and backend data integration to support expense tracking.

Helpdesk Management System - *Spring Boot, React, MySQL, Cloudflare R2*

- Built a full-stack ticketing system with role-based access control, ticket assignment, tracking, and reporting.
- Designed REST APIs and database structures and integrated cloud file storage.

Beverage E-Commerce Platform - *Spring Boot, React, Tailwind CSS, MySQL, Cloudflare R2, Stripe*

- Built product, cart, and order-processing features for an online beverage store, with backend APIs and inventory workflows.
- Integrated cloud media storage and payment processing.

EDUCATION

Diploma in Computer science 2024

Tshwane University of Technology

National Senior Certificate 2018

Thengwe High School

CERTIFICATES

JavaScript | FreeCodeCamp | 2026

JavaScript Essentials 2 | Cisco Networking Academy| 2026

Networking Basics | Cisco Networking Academy | 2026

Java Foundations: Training and Assessment | Oracle | 2026
